Subject: Do a more aggressive cleanup [WARNING: SPF validation failed]

I'd like to comment on the Superfund site clean-up for Portland Harbor.

I live in St. Johns, and use the river front and river often. I swam across it last week. I take my dogs down there.

The clean-up effort needs to be as comprehensive as possible. Those who contributed to polluting it, and made a lot of money doing that, should be responsible for the highest level of clean-up possible.

What is proposed is NOT acceptable and allows only 8% of the toxic site to be addressed. This is our ONE CHANCE to do this right. A more aggressive plan needs to be done.

I agree with local groups that have advocated for the following:

☐ Moves quickly and sustainably reduces contaminants causing harm to Willamette and Columbia river resources

☐ Includes ongoing monitoring and cleanup upriver and downriver from the site

☐ Contributes to healthy fish that are safe to eat for all people

☐ Holds polluters accountable for creating a safer Portland Harbor

The river is our neighbor and our charge to protect and respect. Please implement Plan H.

Kind regards,
